

2020.1b

Released 31st January 2020

The following changes have been made to TTP in this release:

- Fix to resolve a bug in publishing TTP files to <http://lta.tournamentsoftware.com>

2020.1a

Released 13th January 2020

The following changes have been made to TTP in this release:

- A new scheduling function which allows you to schedule complete rounds of an event on a certain day in the most efficient way possible considering those who have multiple matches to play first.

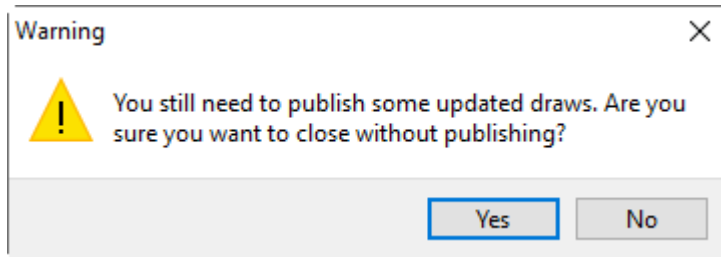

To use this function select **Draws** → **Schedule per day**

Round	Size	Matches
Open Mens Singles - Main Draw		
<input type="radio"/> R1	8	8
<input type="radio"/> QF	4	4
<input type="radio"/> SF	2	2
<input type="radio"/> Final	1	1
Open Mens Singles - Qualifying		
<input type="radio"/> 1 (16)	8	8
<input type="radio"/> 2 (16)	4	4
Open Mens Singles - Pre-Qualifying		
<input type="radio"/> 1 (16)	8	6
<input type="radio"/> 2 (16)	4	4

Simply drag the selected rounds from the selected draws you want to schedule on a given day and Tournament Planner will make an optimised schedule for that day.

This function works where the user is scheduling in an order of play grid or by times.

- The schedule validation can now check if matches are scheduled when a player is not available based on the availability settings on a player's record.
- If a draw has been changed which has not been published yet, you will get a warning when you close Tournament Planner.

- For email addresses which require the use an encrypted connection to send email i.e. Hotmail, Gmail, Yahoo or AOL, the files required are now included with the installation so you no longer need to download these yourself.
- The sort on the players screen have been fixed.
