

DINOSAURS BODY & BALL:

Dino Egg Collection

Set the scene:

“Let’s collect the dinosaur eggs”

Brain focus
activities:

Equipment:

Bean bags

Hoop

How to Play:

- Place a hoop (nest) in the middle of the space.
- Scatter bean bags (eggs) around the space.
- Children move around the space and pick up one egg and place it in the nest.
- They then go and collect another egg and place in the nest continuing until all the eggs are back in the nest.
- Explode the eggs back around the space and play the game again.

TEACHING POINTS:

- Keep head up and watch for others.
- Don't step on the other dino eggs, otherwise you will break them.

SKILL UP:

- Children can choose a dinosaur of their choice and create their own actions to move like a dinosaur around the space when they are collecting the eggs. Or give them different ways of moving e.g. fast dinos – like the velociraptor, or slow dinos, like the diplodocus.
